

演習問題 6 解答

問題 6.1

$$(1) \sigma_1 = \frac{13}{5} p_0$$

$$(2) \varepsilon_\theta = \frac{8p_0}{5E}(1-\nu^2)$$

問題 6.2

$$(1) \sigma_r = -\frac{7}{27} p, \quad \sigma_\theta = \frac{25}{27} p, \quad \tau_{r\theta} = 0$$

$$(2) \varepsilon_\theta = \frac{-7-25\nu}{27E} p$$
